

UKMTHRIFT BY SONNY ANGEL

mobile programming project

INTRODUCTION

UKM Thrift is a mobile app designed for Universiti Kebangsaan Malaysia (UKM) students and staff to buy, sell, and donate preloved items like clothes, shoes, and books, fostering sustainability and community welfare. The platform offers features such as secure inventory management using Room Database, a donation system with scheduled drop-offs powered by Firebase Firestore, and a seamless purchase experience with flexible payment options, including cash and RHB student cards. By enabling the reuse of items and promoting a circular economy, UKM Thrift reduces waste and supports a socially responsible campus culture.

PROJECT CHARACTERISTICS

Core Features

Sell Inventory

Enables users to list items for sale, with inventory management handled locally using Room Database.

Donation System

Allows users to donate items, select drop-off locations, and schedule donation dates, with data securely stored in Firebase Firestore.

Buy Feature

Facilitates browsing and purchasing items, offering flexible pick-up options and seamless transactions.

Payment Integration Supports payments via cash or RHB student cards through a secure gateway.

Technology Stack

- Room Database for local data management.
- Firebase Firestore for secure cloud storage and retrieval.
- Android Jetpack Compose for UI design and navigation.
- Firebase Authentication for user registration and login.

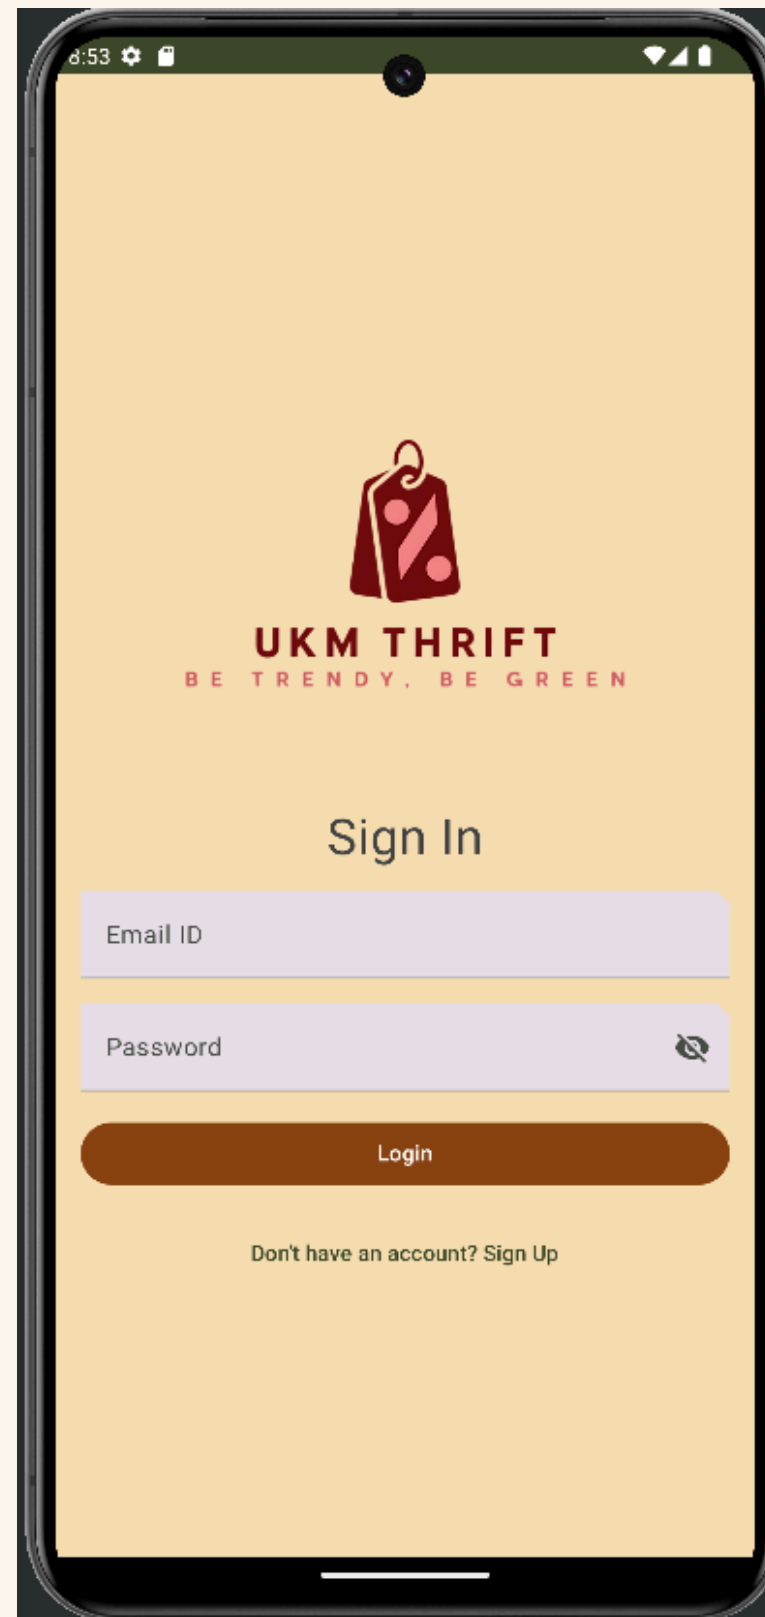

Sustainability Focus

- Promotes a circular economy by encouraging the reuse of items, reducing waste, and fostering a culture of giving.
